At a recent meeting of the Congregational Church of Clinton (Connecticut), 108-year-old Dr. Grace Wall and her 70-year-old daughter Elizabeth Walder each received the position of president of the Women's Committee of the Evangelical and Reformed Church in America (ERCA). The move is a first in the church's history, and is the result of an unusual action taken in the denomination's General Assembly last year. After 10 years of active service, Dr. Wall, who served as president of ERCA for the previous decade, announced her resignation in July 2017, and her daughter was subsequently selected as her successor. Dr. Wall's daughter agreed to serve for three years, and as it turns out, the timing of the vacancy was such that both women could be elected to the board at the same time. "It was kind of a surprise to me that it was so easy," Dr. Wall told Christianity Today last week. "They sent it to me and I didn't know that it was in the question and answer portion [of the questionnaire]. The question was, 'What is the next important opportunity for me to take on?' And they said, 'You know, are you interested in serving on the Women's Committee of the church? We thought it would be kind of a fun thing to do.'" Grace Wall took the opportunity to talk about her two decades a1d647c40b
