Import and use stickers and markers with no additional drawing steps. Use emojis and symbols to enhance your designs. StickerSet: Import and use stickers and markers with no additional drawing steps. Use emojis and symbols to enhance your designs. New Coordinate System: Workspace Coordinate System (WCS): Manage and track your drawings within the workspace. Change the current workspace using the workspace dropdown. Workspace Properties: Update workspace properties as you add and remove drawings. Inspect: Inspect automatically includes the most recent value. This makes AutoCAD easier to use and more predictable. Improved Performance: Improve performance when opening/updating files, setting preference values, and interacting with other apps. Design apps receive performance updates that include responsiveness and reduced file size, giving you more capacity to work and save. Saving Options: Automatically save drawings when you exit your drawing session. Choose how frequently you want to save. Improvements to New Drawing Creation: Include new drawing creation options that let you focus on design and layout. Include new drafting commands: Layer Manager: Use the Layer Manager to manage your drawing layers. You can add, remove, and manage the visibility of layers. Tags: Create and manage tags in your drawings. Tags help you organize and find drawings. They are similar to folders and labels. You can search tags and move them between drawings and project folders. Sketch: Sketch is a new feature for editing 2D views. Use Sketch to quickly create shapes, edit them, and work with them as a group. Extensions and Add-ons: Extensions and add-ons are available for AutoCAD for iPad. Install extensions directly on your iPad to improve productivity. Printing: Print wireframe, profile, and dimension views. Trace: Choose to show or hide layers and annotation when tracing. Interactive Help: Visually show or hide Interactive Help in context. Design-time Prompt: Ask for your input before you perform a command. This is helpful when the command is a multiple step process. Speech Recognition: You can use the speech feature to enter values, copy and paste, and navigate your
