DWG data to surfaces and dimensions Enhanced functionality and performance for data transfer through the Internet GPU support An extensive, new toolbox and user interface, which emphasizes collaboration with AutoCAD and DWG data on a tablet. Mac OS X AutoCAD support on MacOS X operating systems was discontinued in version 2009. A

new API, OBJARX is used for 3D data import and export. A new 2D API, AutoLISP, is used for extensibility and automation.

AutoLISP allows .NET and Visual Basic developers to extend the feature set of AutoCAD, along with other programming languages. It is capable of reading and writing the exchange format, DXF. Supports import and export:

DXF (AutoCAD Drawing Exchange Format) STEP (Structure for Translation in Mechanical Engineering) IGES (ISO 11511-1) STL (Autodesk 3DS) USER (Autodesk User file) WCS (Geographic Information System) XML (autodesk XML for compatibility with other AutoCAD applications) OBJ (Autodesk Object File) ILF
