Platinum is used by more than 45.1 million patients each year in the USA alone.2 The individual results of various tests give valuable and specific information that is used to diagnose and manage patients.2.4: Platinum provides new and improved features to demonstrate how the training modules and activity kits are used to actively engage learners. Platinum [4].The training modules and activity kits help improve learning and implementation of the training. In addition, the many interactivity features help improve retention of information and learning.The preparation and implementation of tests can be a major obstacle to training and deployment of materials. For example, an activity which might be appropriate for a doctoral level course in a lab, could not be effective if a student is a student of speech-language pathology. Is has been shown that a key issue for success of any training is adequate preparation and implementation. How do we know it's Platinum? Platinum.1 to 3.2.
