SVDDownloader is a straightforward application built specifically for helping you download video files from the Internet. It boasts an intuitive interface that offers quick access to the running tasks, downloaded files and completed downloading sessions. SVDDownloader features a powerful built-in search engine that allows users to look for different web videos on the fly. You can select the video-

sharing websites from a preset list (e.g. YouTube, Metacafe, Myvideo) or insert a valid URL in the dedicated box. The search results are displayed in the primary panel, and you can view the videos before actually downloading them. It is possible to start, pause or stop the current downloading task, as well as delete it. The program offers time estimation for completing the job, and you can view details about the status, size and speed at the end of the downloading process. Additional settings give users the possibility of specifying a default saving

directory and the maximum number of retry times, making the application run at Windows startup, changing proxy settings and adding details about each video by specifying the title and inserting a description. During our testing we have noticed that the program is able to download videos very quickly and without errors throughout the entire process. All things considered, SVDownloader is a simple-to-use download manager that can be configured even by less experienced users. Description: SVDownloader is a
