Current Procedural Terminology Coding Guide (CPT®) is a collection of guidelines, codes and descriptions for reporting medical services provided. The CPT guidelines define the scope of the CPT, as well as the responsibilities of the personnel who should be involved in the implementation of the CPT procedures. The CPT guidelines are primarily targeted at healthcare professionals and describe their role in the delivery of health services. The CPT guidelines cover the main activities, but at the same time they do not include all aspects of the procedures that are required for the provision of health services.
