Open Autocad and go to File>New>Section>2D>Sketch Section. Select a sketch template from the drop-down menu. Click on the Sketch Tools tab. Go to Edit and the drop-down menu should be filled with CAD Extensions. Select the "PENETRATION" extension. Close the dialog and the pen is now activated. You can now start drawing the section. Q: How to write log record to stdout with log4j2? I'm trying to write a log record to stdout using log4j2, I have a java class called myClass, I have a method in that class called log that should write the record to stdout, but I can't get it to work. Here is my log4j2 config file: %d{HH:mm:ss.SSS} %-5level [%X{SPN}] - %msg%n Here is the code in myClass:

```
package com.package.log; import org.apache.logging.log4j.LogManager; import org.apache.logging.log4j.Logger; public class MyClass { private static Logger log = LogManager.getLogger(MyClass.class); public MyClass() {
```

OpenRaster: Rapidly iterate on your designs using 3D rendering. Use the same browser plug-in as Autodesk Fusion 360 to see your designs in virtual 3D. (video: 1:36 min.) Database: Synchronize external files with the Database. Keep your drawings linked with your shared file attachments, so that they always stay where you put them. (video: 1:33 min.) Autodesk License Portal: Create and manage your own AutoCAD subscriptions, such as Learning Center, Planner, Color, and more. This version also includes the following features: New user interface VoiceOver support Planner BetterPlanner compliance with the CHA plan Planners and assignments added External line and arc guides Many more improvements and bug fixes What's new in AutoCAD 360 Rapidly respond to feedback from your customers. With the new feedback features, customers can now receive notifications when a change is made to their plan and can respond to changes that are made to their plan using a new, more efficient online interface. Using AutoCAD 360's new "post-change approval" feature, they will receive a notification to review a change and respond to the change in a single click, without having to visit the plan page. Any future changes made to the customer's plan that are identified in the feedback will also be automatically updated in the plan. How to easily add and update plans for your clients New user interface AutoCAD 360 is now using a new interface for the Plans view. This interface includes major changes that are designed to make it easier for users to manage their own plans and their customers' plans. With the new user interface, you can: Quickly view the plan you are currently working on Quickly access planning tools More easily add, edit, and manage your customers' plans More easily search and find plans More easily edit customers' plans Save time by using the new user interface for editing customers' plans New plan management tools AutoCAD 360 now includes a few new tools to help you manage your customers' plans more easily. Plan approval tool A new plan approval tool lets you: Send
