0.0.1 Patch - ENG DOWNLOAD ME!!! -> LINK_____ NEWS IN THE GROUND! - 11.04.2019Today, we have finished the in-game map of Derevi Caverns, please do go ahead and visit our court (KRON-DE) in-game so that you may suggest updates and small changes yourself!_____We have now officially finished our carrier module for the court version. It is a very small update to the base itself, however it does make the way the city moves, deploy units and land on and take off the base much more effective and easy.We have also discussed with several people here about making a tower for the rockets in the north at the top of the city in the valley and across from the spire. It is fairly certain that the player can not build anything inside the valley itself, as i am fully aware that this would be a giant within a giant with no access to read access for the player, but the view from the top of the valley which overlooks the spire is far way from the spire, and thus it can be done.We are always very much open to suggestions, and more suggestions are always welcome!Kind of both. It is for sure a monster pack that gives background information about the monsters and is kind of a Monster Pack all the way! With the Monster Pack as a whole, you get to know more about the "out of the book" monsters from the book while also seeing "their monster"-ness in the case of the existing monster packs, it plays a role in that respective monster pack.The intro of Natuharu Caravan is now complete. All i'm missing is having a proper sound where it is suppose to begin.For the next four updates, we have added the launch sequence of the two main units.We have also changed the graphics and look of Araxin Grove, added some more flags, and changed some minor things with it.We have also finished the visual effects for Derevi Clan.It will be released whenever we feel like it. It is quite a big armor sheet.We have also tweaked the rpgmaker MV main camera and resolve a lot of issues with it. NOTE: NOTHING has been re-aligned, the screen is now centered and just perfectly fine. PLEASE MAKE SURE THAT YOU HAVE THE LATEST UPDATE! BEFORE PATCHING!Download me here!Rpg maker!
