Previously, scientists thought that two pockets of solifluction in the Antarctic ice core were deposited in the order millions of years ago that they are now. But in the ice core of Antarctica, like in all other ice cores, layers of more recent solifluction that appear on top of layers of older solifluction are deposited in the order of time. But hints of an earlier order of solifluction layers that dipped in the same direction and were deposited at roughly the same time have been observed in the Antarctic ice core. Based on the evidence of this two-pulse order, the scientists realized that the dust layer was deposited seconds after the column containing the two solifluction layers whose ages overlap. A last pulse of sediment was deposited at the same time along with the dust layer. Scientists believe that the order of the solifluction layers in the Antarctic ice core points out the difference between the mechanisms of deposition of sediment in the oceans and sediment on ice sheets. According to the scientists, both grain size and fluxing mechanisms vary within each deposition pulse. In turn, these vary from high-energy fluxing events (e.g. storms) to low-energy fluxes (e.g. wind). The results revealed that when fluxes are high or are intermittent in higher oscillations, the solifluction pulses tend to be composed of large grains and little dust, whereas in lower oscillations, the solifluction pulses tend to be composed of smaller grains and more dust. According to the scientists, this means that the solifluction layer was formed out of two parts: one large grain-rich part and one dust-rich part, which were deposited at roughly the same time. The study of the Antarctic ice core was carried out through the Max Planck Institute for Chemistry in

ROG STRIX is an action-packed first-person shooter in which players control Major Ash Williams who has returned to duty after a 20-year-long military leave to confront and terminate the most-skilled, most-experienced, and most-dangerous advanced predator life form: the carnivorous human beings known as Lycans. LEAD THE U.S. MILITARY IN A RIVAL FIRST-PERSON SHOOTER AS THE ULTIMATE CINEMATIC, ACTION-PACKED GAME OF WAR (See the Link Below) About The Tournament Join the final battle! It's time to tear down the walls between human and Lycan. The Lycans are recruiting and they will stop at nothing to destroy you. A self-assured warrior, Major William Ash Williams is in no mood for compromise. But the Lycan terror is on a rampage, and no amount of firepower, training, or experience can stop them. Defeat them and you will earn the right to call yourself a full-blooded, human-to-Lycan convert, the only one brave enough to accept the challenge. Players guide Williams, a special forces warrior who has been absent from the battlefield for a long time, through a number of rooms and hallways filled with Lycan hostiles, each one more deadly and complicated than the last. Each of them is tasked with a different objective, such as infecting a room or securing a bridgehead. They must avoid the traps and pitfalls on their path as they attempt to fulfill their duties and earn a victory. In order to achieve these goals, players must learn to use a variety of weapons, from machine guns, to rocket launchers, and more. Skill is important, as is speed. Dead ends, traps, and obstacles can be lethal. The atmosphere of the game is dark and dreary in the beginning, but as players proceed through the levels of the game, new and dangerous environments are introduced, leading to a chilling and heavy conclusion. Key Features: Over 10 handcrafted maps with epic and dramatic story-driven levels. Powerful, realistic weapon effects. Character/weapon customization. Multiple campaigns with special characters, features, and game modes. Strategic and tactical shooter game play. Players can create their own custom characters at will. The game has a huge multiplayer meta-player community.
